Challenge One

For the first challenge, just produce a simple stopwatch and alarm on the same page, following the layout below:

Functionalities:

    - Obviously the timer and alarm must work correctly;

    - When the user clicks the Start button, the text should change from "Start" to "Stop";

    - By default, the alarm should start with 5 minutes. And by clicking on the number, the alarm value can be changed;

    - The site must be responsive.
